5th IAHR EUROPE CONGRESS
New challenges in hydraulic research and engineering
12-14 June, 2018
Trento, Italy
The 5th IAHR Europe Congress aims to bring together the hydraulic community and to provide a forum where scientists, especially early career researchers, can present their work and discuss their ideas with experts in all fields of hydraulics.

The congress deals with traditional themes linked to water (hydraulics, hydrology, fluids mechanics and hydraulic constructions) and also with frontiers themes between fluid mechanics/hydraulics and others disciplines, i.e. morphology and eco hydraulics, the ecology of aquatic environments, bio fluids, new strategies of defence against extreme events and the effects of climate changes.

The congress will adopt a **new format**: thematic sessions will be organized in parallel to the traditional scientific sessions directly by conveners, which have the tasks to propose themes, to invite speakers and to manage abstracts. **If you want to organize your session as a convener, write to iahr2018@unitn.it soon.**

In parallel to scientific sessions, participants can propose to:
- Organize the meeting of EU projects
- Organize discussions on EU policy, the founding opportunities, the legislations…
- Scientific events: short courses, workshops (during the congress);
- Master classes, schools etc. (the week before the congress);

**Two keynotes** are scheduled too.

Abstract submission will be opened from September 2017.
